SUMMARY

Full-stack developer with practical experience in React, React Native, Node.js, Supabase, and Firebase. Skilled in building responsive web and mobile applications, integrating APIs, and developing AI-enabled features. Strong problem-solving ability, quick learning curve, and proven performance through internship work and real-world project delivery.

EDUCATION

Gautam Budhha University

Information Technology

July 2027

Current CGPA: 7.02/10.0

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML, CSS, C++, C, PHP

Databases: MySQL, MongoDB, Supabase, Firebase

Frameworks: React, React Native, Flutter, Angular, Node.js

Machine Learning: Supervised Learning, Predictive Modeling

Data Analytics: SQL Queries, Data Cleaning, Visualization (Pandas), Green Skills

Tools: Git, Postman, Jupyter, VS Code, IntelliJ, ChatGPT, Lovable (Gen AI), Wix, Bubble.io

Cloud Platforms: Google Cloud

PROJECTS

E-commerce Website | *React.JS, Node.JS, Tailwind CSS, Prompts (AI Tools), APIs*

2023

- Architected a full-stack e-commerce platform using React and Supabase for authentication, database, and backend.
- Developed a live cart system that reduced cart abandonment through real-time updates and optimized UX.
- Created an admin dashboard enabling product CRUD operations and improved dashboard load time using optimized queries and caching.

AI Hospital Website | *React.JS, Node.JS, Tailwind CSS, Prompts (AI Tools), APIs*

2024

- Built an AI-driven medical platform that helps patients describe symptoms and receive preliminary guidance.
- Developed role-based dashboards for doctors and patients, enabling secure chat, appointment booking, and medical record management.
- Integrated ML-based APIs that improved department/doctor recommendations accuracy.

Internship Mobile Application | *React Native, Firebase, Tailwind CSS, Prompts (AI Tools), APIs*

2025

- Built a mobile app enabling students to search, filter, and apply for internships in real time.
- Implemented authentication, user profiles, and dynamic internship listings, resulting in faster data retrieval via optimized Firebase queries.
- Created an admin dashboard for posting internship openings and reduced posting-to-approval workflow time.

EXPERIENCE

Research and React Frontend Developer Intern | *HeyInterns Company*

May 2025 – July 2025

- Contributed to production-level projects, including a Web Development Services Website and an Internship Mobile Application.
- Built responsive and high-performance UIs using React and React Native, improving page load and interaction speed.
- Conducted technical research on modern tools and frameworks, enabling the team to reduce development time through better tech decisions.
- Delivered tasks with strong ownership, consistent quality, and attention to detail, maintaining on-time delivery rate.

CERTIFICATIONS

- AI-ML and Data Analysis (Samsung Innovation Campus) Certification
- GenAI (LinkedIn Learning) Certification
- Prod-E-G Hackathon (Final Round) Certification
- Microsoft Power BI Certification
